Le Med Nose Guard

Le Med Nasal Splint is clinically proven to reduce bruising and swelling. It helps to promote healing and enhances the aesthetic outcome after nose trauma or surgery.

INDICATION FOR USE:

1. After nose injury or trauma including fractured nasal bone, it provides comfort; speeds up healing and reduces risk of crooked nose.
2. To reshape and enhance appearance of nose.
3. Post surgical and injectable rhinoplasty.
4. Helps to reduce snoring.
5. Do not use on broken skin.

Le Med Nose Guard

- Ergonomic design to fit the natural contours of the face.
- Rolled edges for additional comfort and helps avoid demarcation.
- Gentle, adjustable compression force of 3-5mm Hg helps prevent compromised skin circulation.
- A split window to provide ventilation for the skin.
- Elastic and bio-compatible material for comfort.
- Solid wall panels that provide maximum protection for the traumatised nose.
- Flexible wings that can be bent up or down for a perfect fit.
- A self-adhesive dorsal pad can be used under the splint to compress the nasal dorsum if needed.
